

## Supercyan Character Packs v1.0

### Details

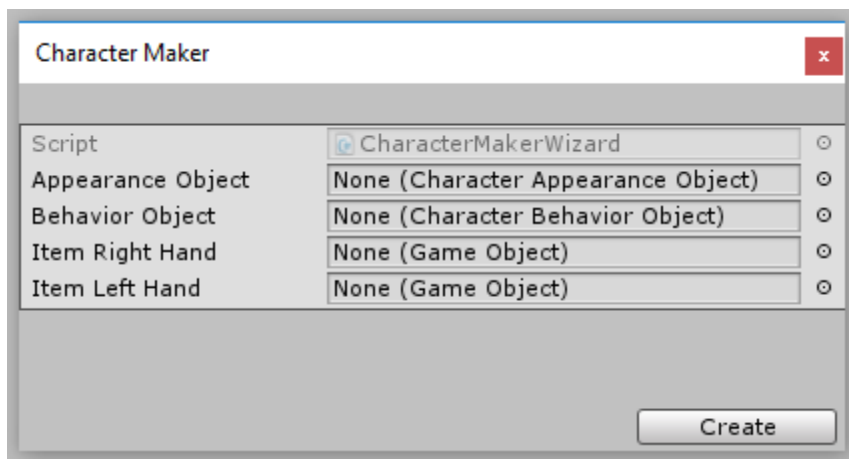

- Each pack contains new models and prefabs
- When a new pack is released, older packs are updated with new animations and behaviors
- Supercyan Character Maker
  - A new tool used to combine appearance and behavior objects to create full characters
  - Appearance Objects are unique to the pack they are released with
  - New Behavior Objects are added to all packs when a new pack introducing them is released

### Supercyan Character Maker

- The Character Maker can be found under Supercyan on the taskbar

- This opens a new window

- In this window you can spawn a character prefab on the scene by *combining an Appearance and a Behavior object*
- You can also add items and they will be moved on the right spot in the character hierarchy
